Koefaga Coconut Oil

Cold press pure organic coconut oil.

Truly the Pacific's best kept secret is the coconut. Amongst its uses are food, drink, medicine and fuel. Koefaga Pure Coconut Oil is hand-crafted and left to mature so the natural coconut aroma remains.

Coconut oil contains no trans fats, no cholesterol, and being naturally stable can be stored for a long time and remain fresh. Coconut oil solidifies below 23°C and is best stored away from sunlight.

Coconut oil is now recognised as one of the healthiest oils, a fact known for centuries in the tropics where coconut has been a nutritious part of the staple diet. Now available as a virgin cold press oil, coconut oil is being recognised as beneficial to health, supporting a healthy metabolism, ideal for skin care especially for children and the elderly, as it is totally natural, and for massage.

Healthy Coconut Oil

For digestive health, an adult may take up to 3 tablespoons of coconut oil a day. One of the main food acids in coconut oil is lauric acid which is also a major food acid in breast milk.

Anti-bacterial and anti-microbial qualities also make coconut oil an effective insect repellent and skin conditioner.

Vanilla ...

Koefaga Vanilla Pods

Plump, dark, oily, fragrant, make the dishes you see on TV cook shows and enjoy this wonderful ingredient.

Koefaga Vanilla Range

Luscious fragrant vanilla has been a foundation flavour most of us have enjoyed from childhood. Vanilla icecream is a staple world wide. Vanilla on Niue is organic and grown mainly in small family plantations. A member of the orchid family, the vanilla orchid grows like a runner bean and needs to be supported on shelter trees. Each flower is individually hand pollinated, and after the pods mature there is a slow and careful curing process that turns the fresh green pod into the fragrant culinary pod. Koefaga vanilla products are made from pods sourced from reputable Niuean growers.

Koefaga Vanilla Essence

It takes time to infuse the vanilla flavour for a high quality essence, and our essence has been months in the process. Vanilla rounds out flavours, reduces the 'egginess' or 'milkiness' in dishes, and adds that special something in the all-time favourite whipped cream.

Koefaga Vanilla Paste

The aroma bursts out of the jar of our infusion paste. Use to infuse milk for custards and sauces. Strained through a fine sieve to remove the crushed pod pieces this lets the vanilla seeds remain to feature in your dish. Just one teaspoon equates to a whole vanilla pod. The hard work has been done, all you need to do is spoon out the fragrant paste into fruit cakes, banana and chocolate cakes, sauces, custards and ice cream.
